Computational Workshop on

Frobenius Singularities and Invariants

May 29 through June 1, 2012
University of Michigan, Ann Arbor, Michigan

Lecture Series:

Test Ideals and F-Jumping Numbers
Karen Smith (Michigan)
Daniel Hernández (Minnesota)

F-Signature and Hilbert-Kunz Multiplicity
Craig Huneke (Kansas)
Paul Monsky (Brandeis)

Computation of Tight Closure
Holger Brenner (Osnabrück)

Speakers:

Bhargav Bhatt (Michigan)
Florian Enescu (Georgia State)
Mordechai Katzman (Sheffield)
Claudia Miller (Syracuse)
Anurag Singh (Utah)
Pedro Teixeira (Knox)
*Vijaylaxmi Trivedi (Tata)
Takehiko Yasuda (Kagoshima)
* = to be confirmed

Organizers:

Karl Schwede (Penn State)
Kevin Tucker (Princeton)
Wenliang Zhang (Michigan)

Registration and limited funding available at:

http://sites.google.com/site/computingfinvariantsworkshop/

Graduate students, young researchers, women, minorities, and members of other under-represented groups are particularly encouraged to apply (deadline for full consideration: March 1).

Partially Supported by the NSF under Grant DMS 1160927
